

HEALTH AND SAFETY IN THE WORKSHOP

Create a poster to help people using the workshop, or machinery in the workshop, to remember how to keep safe

1. Study the workshop safety rules sheet
2. Design a Safety Poster that could be displayed in a workshop.
3. It must clearly encourage pupils to follow the rules.
4. The poster should be drawn accurately and include colour and shade. See the two examples on this page.
5. Notice that the samples both have suitable symbols for the corners and a simple border.
6. The title "Safety in the Workshop" appears prominently in both.
7. Other drawings have been added as well as colour and shade.
8. The message is simple and easy to understand - SAFETY
